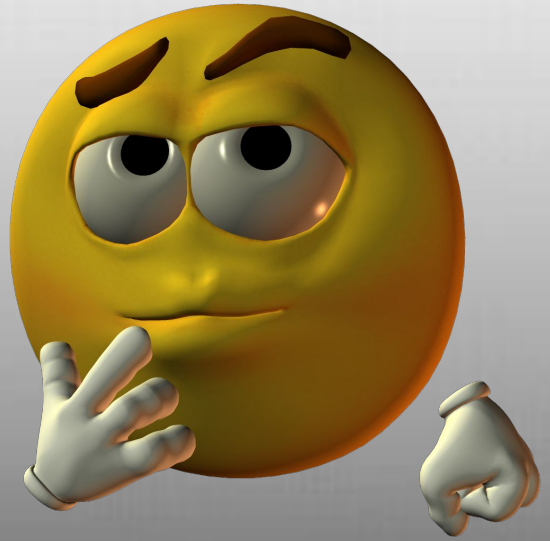
Prediction

Should the Big Cheese race on the 16th?

16th High Temp: 91.2°F
16th Low Temp: 68.8°F
Precipitation: 30% chance of rain
Precipitation: 2.84 (in) in the event of rain
Humidity: 81.2%
Wind Speed: 14 mph
Wind Direction: 201.71° (SW)
Dew-Point: 66.7° (F)

You’ll Need

- **An Umbrella/Poncho**
- **Electrolyte rich foods/drinks**
- **Breathable clothing (linnen, cotton, and or moisture-wicking)**
- **Light-weight, quick-drying, and/or waterproof running shoes**
- **Energy dense foods and water (No Energy drinks)**



These conditions point to a warm, humid day with a decent chance of fairly heavy rain and some steady wind. With the warmer temperature mixed with high humidity and dew point, it’s important to stay hydrated and cool in order to not suffer from exhaustion and heat stroke. Bringing waterproof and or quick-drying clothing will also combat possible rain throughout the race. And nutrient-dense food will help you stay energized and motivated. Overall, the race will be possibly, but quite a challenge without proper preparation.
